Start Point Grid reference is usually at the westernmost end of the path

End Point Grid reference is usually at the easternmost end of the path

Details of where each numbered path is (along with previous annual inspections) can be found via this link:-

We are looking at producing an updated version of a Parish Footpaths booklet so it would be really helpful if when walking the path you can take a number of photographs (all in landscape format) to help anyone walking the path to be able to navigate their way along it (i.e. at points when it changes direction, etc.)
